Electromagnet Witchdoctors

Demons and Human Agents

The powers of Darkness use human agents who band together and operate in pacts, such as witchcraft, occult, cults, secret societies, false Christian churches. These groups commonly use a circle for attracting and amplifying what they call “energy”. The invisible powers that they are calling “energy” are demons or bewitching spirits manipulating modern technologies. They are

caging the person's mind, body and spirit in the circle. Eternal rings and triangles do not have breaks. There are objects in their circles that attract and hold the desired they call "vibrations" but they are demons.

Regular exposure to radio frequency radiation may interfere with the electrical fields of our cells. Common health challenges that have been linked to regular exposure to radio frequency radiation include. Abnormal cell growth and damage to cellular DNA Difficulty sleeping, depression, anxiety, and irritability wireless-altered brains lead to lack of concentration, memory loss, aggressive behavior, accelerated aging, impaired learning ability and dementia. Fibrils of proteins clumping in electromagnetically-altered brains identifying characteristic of Alzheimer's, Early Onset Alzheimer's, Parkinson's, Fibromyalgia, and Multiple Sclerosis and cancer patients.

"Countless people will hate the New World Order and will die protesting against it." ¹

Witchcraft Modern Technologies

Mark 16:18 King James Version (KJV)

¹⁸ They shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover.

Morgellons disease is mysterious and controversial. Here you'll find answers to common questions about Morgellons disease — and suggestions for coping with it. ⁱ

Managing a mysterious skin condition

Father, in the Name of the Lord Jesus Christ, "And Jesus came and spake unto them, saying, All power is given to me in heaven and in earth. Go ye therefore, and teach all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost. Teaching them to observe all things whatsoever I have commanded you: and lo I am with you always, even unto the end of the world. Amen." (Matt. 28:18-20).

We come boldly to your throne of grace standing in the gap and holding together against the evils that would attempt to hold or bring bondage against the issues that we will present to You. We take the authority to bind the strongman according (Matt. 16:19, 18:18). We take authority over Satan according to (Lk. 11:20, 22), and over all evil spirit power working in and through the following: the powers of witchcraft and Satanists covens in this country, state and city. We break all the blood sacrifices, ritualism, roots and planting, curses, vexes, hexes and spells over our families, churches, city, state and country.

Father, you said that whatever we bind on earth is bound in heaven and whatever we loose on earth is loosed in heaven. We have the power to cast out demons in Jesus name and tread on every serpents and scorpions in the name of Jesus. We command you Satan, and your powers of the principalities, the powers, the rulers of darkness, and spiritual wickedness in high places and demonic spirits of, (name any spirits the Holy Spirit brings to mind), assigned to this prayer group and its families to be bound. You are the defeated foe.

We yield ourselves to Your holy power by taking our position in Christ Jesus Who is sitting in the heavenlies. We cover ourselves and our families with the blood of Jesus. We bind all

retaliating devils against everything we own, our flesh and our family. We stand in our authority as Your children and push back the powers of darkness. We bind and cast down the strongman and every stronghold of Satan over our lives, and families.

We lose upon Satan, his headquarters, stronghold, orders, plans, curses and demons, the curses of the Midianites (Judg. 7:25), Ammonites, Moabites and Edomites (II Chron. 20). Let panic, frustration, havoc, confusion, pandemonium, disasters, chaos, destruction upon each other, the hornets of the Lord descend upon them (Exod. 23:28; Deut. 7:20).

All species and life forms are under deliberate, multiple attack. It's not like a dog barking or rattle snake near you that your instincts know to react to, and understand your instincts aren't your own anymore, they've been co-opted, it's an awareness of your surroundings, LOOK UP, what goes up must come down. Does that look like a normal contrail or cloud, if not you're probably breathing that!!! Maybe you should be concerned. No those aren't clouds they're chemicals (type in strange days strange sky's or see my photos). Think again for your survival and most importantly others'. Spend a few hours proving anything you've been told to believe. You'll likely find them to be all lies!!! The state and feds have all said those are normal contrails and not to worry, see my photos, are those clouds or chemicals? If they look like chemicals, they probably are, are you worried yet?? Do you still believe them? If so you're in trouble as we all are.ⁱⁱ

[By Mayo Clinic Staff](#)

Morgellons disease is an uncommon, unexplained skin disorder characterized by sores, crawling sensations on and under the skin, and fiber-like filaments emerging from the sores. It's not certain what these strings are. Some say they are wisps of cotton thread, probably coming from clothing or bandages. Others say they result from an infectious process in the skin cells. Further study is needed. ⁱⁱⁱ

Signs and symptoms

People who have Morgellons disease report the following signs and symptoms:

Copyrighted Material

IT FEELS LIKE BUGS ARE CRAWLING UNDER YOUR SKIN!

It has struck all across the globe with horrifying symptoms that seem to be ripped straight from the pages of a horror novel. Its victims all complain of the same symptoms, yet doctors brush them off as being in their head.

It is called Morgellons, and it seems to have appeared out of nowhere and is rapidly spreading with a speed and ferocity that has left its victims shocked and helpless. Sufferers first notice a strange feeling as if bugs are crawling and biting just under their skin. More terrifying are the weird sores that sprout thread-like fibers that almost seem to be alive!

Those unlucky enough to have caught Morgellons are left helpless, ignored, and worse yet, labeled with the stigma of mental illness to explain away their sickness. Nevertheless, Morgellons is all too real, only the true causes and origins of this disease remain shrouded in mystery.

RIGHT NOW WE ONLY HAVE THEORIES ON WHAT MORGELLONS ACTUALLY IS:

- Is it a natural disease that has been with us all along?
- Is it a man-made disease that has somehow escaped from a lab?
 - Is it biological warfare, or a terrorist attack?
- Is it an extraterrestrial pathogen that has managed to root itself upon planet Earth after traveling inconceivable distances from outer space?

What Chemtrails Are Doing to Your Brain - Neurosurgeon Dr. Russell Blaylock Reveals Shocking Facts.

Linderman Unleashed Radio Show March 28th 2013 Broadcast. Curt Linderman speaks with Dr. Blaylock about the devastating health effects of the chemtrails and geoengineering programs which have been implemented in secret without public consent. Chemtrails, Nano aluminum and Neurodegenerative and Neurodevelopmental Effects by Russell L. Blaylock, M.D.

The Internet is littered with stories of "chemtrails" and geoengineering to combat "global warming" and until recently I took these stories with a grain of salt. One of the main reasons for my skepticism was that I rarely saw what they were describing in the skies. But over the past several years I have notice a great number of these trails and I have to admit they are not like the contrails I grew up seeing in the skies. They are extensive, quite broad, are laid in a definite pattern and slowly evolve into artificial clouds. Of particular concern is that there are now so many dozens every day are littering the skies.

My major concern is that there is evidence that they are spraying tons of nanosized aluminum compounds. It has been demonstrated in the scientific and medical literature that nanosized particles are infinitely more reactive and induce intense inflammation in a number of tissues. Of special concern is the effect of these nanoparticles on the brain and spinal cord, as a growing list of neurodegenerative diseases, including Alzheimer's dementia, Parkinson's disease and Lou Gehrig's disease (ALS) are strongly related to exposure to environmental aluminum.

Nanoparticles of aluminum are not only infinitely more inflammatory, they also easily penetrate the brain by a number of routes, including the blood and olfactory nerves (the smell nerves in the nose). Studies have shown that these particles pass along the olfactory neural tracts, which connect directly to the area of the brain that is not only most effected by Alzheimer's disease, but also the earliest affected in the course of the disease. It also has the highest level of brain aluminum in Alzheimer's cases. The intranasal route of exposure makes spraying of massive amounts of Nano aluminum into the skies especially hazardous, as it will be inhaled by people of all ages, including babies and small children for many hours.

We know that older people have the greatest reaction to this airborne aluminum. Because of the nanosizing of the aluminum particles being used, home filtering system will not remove the aluminum, thus prolonging exposure, even indoors. In addition to inhaling nonaluminum, such spraying will saturate the ground, water and vegetation with high levels of aluminum. Normally, aluminum is poorly absorbed from the GI tract, but Nano aluminum is absorbed in much higher amounts. This absorbed aluminum has been shown to be distributed to a number of organs and tissues including the brain and spinal cord. Inhaling this environmentally suspended Nano aluminum will also produce tremendous inflammatory reaction within the lungs, which will pose a significant hazard to children and adults with asthma and pulmonary diseases.

I pray that the pilots who are spraying this dangerous substance fully understand that they are destroying the life and health of their families as well. This is also true of our political officials. Once the soil, plants and water sources are heavily contaminated there will be no way to reverse the damage that has been done. Steps need to be taken now to prevent an impending health disaster of enormous proportions if this project is not stopped immediately. Otherwise we will

see an explosive increase in neurodegenerative diseases occurring in adults and the elderly in unprecedented rates as well as neurodevelopmental disorders in our children. We are already seeing a dramatic increase in these neurological disorders and it is occurring in younger people than ever before. ^{vi}

In addition to **symptoms** from the skin, individuals often have **symptoms** from other organ systems: Nervous system: Headaches, fatigue, visual disturbances, **tinnitus** (ringing in the ear), short term memory deficits **and** emotional lability (instability)...

- Skin rashes or sores that can cause intense itching^{viii}
- Crawling sensations on and under the skin, often compared to insects moving, stinging or biting
- Fibers, threads or black stringy material in and on the skin
- Severe fatigue
- Difficulty concentrating
- Short-term memory loss

The intense itching and open sores associated with Morgellons disease can severely interfere with a person's quality of life.

[Morgellons Research Foundation®](#)

"Morgellons is an unexplained and debilitating condition that has emerged as a public health concern. Recently, the Centers for Disease Control and Prevention (CDC) has received an increased number of inquiries from the public, health care providers, public health officials, Congress, and the media regarding this condition." The current number of registered families: 14,720 ^{ix}

Morgellons Disease Symptoms

Symptoms These structures can be described as fiber-like or filamentous and are the most striking feature of this disease. In addition, patients report the presence of seed-like granules and black speck-like material associated with their skin. Fig 1. and Fig 2. below show Fibers emerging from a lesion on child's lip at 200x.

Morgellons Syndrome

The Morgellons Research Foundation (MRF) is a 501(c)3 non-profit organization established in 2002 in honor of a two-year-old child with an unknown illness, which his mother labeled “Morgellons disease”. The MRF is dedicated to raising awareness and research funding for this poorly understood illness, which can be disfiguring and disabling, and affects people of all age groups including an increasing number of children. The number of families currently registered with the MRF is believed to represent a fraction of the true number of affected families. The MRF fully supports the formal efforts by the CDC and Kaiser Permanente’s Northern California Division of Research to investigate Morgellons disease. The MRF will continue to financially assist the ongoing efforts of private research scientists who are dedicated to solving the mystery of this tragic illness. CDC Investigation: The Centers for Disease Control and Prevention in conjunction with Kaiser Permanente’s Northern California Division of Research held a national media telebriefing on January 16, 2008 announcing government efforts to investigate the cause of this illness. Follow this link for a transcript of the media telebriefing. According to the CDC: “Morgellons is an unexplained and debilitating condition that has emerged as a public health concern. Recently, the Centers for Disease Control and Prevention (CDC) has received an increased number of inquiries from the public, health care providers, public health officials, Congress, and the media regarding this condition. Persons who suffer from this condition report a range of coetaneous symptoms including crawling, biting and stinging sensations; granules, threads or black speck-like materials on or beneath the skin; and/or skin lesions (e.g., rashes or sores) and some sufferers also report systemic manifestations such as fatigue, mental confusion, short term memory loss, joint pain, and changes in vision”

In Loving Memory of Ken Cowles

Welcome to the brave new world of toxic barium skies, weather control, mind control and population control through the use of chemtrails modulated with electromagnetic frequencies generated by HAARP. Our health is under attack as evidenced by the skyrocketing rates of chemtrail induced lung cancer, asthma and pulmonary/respiratory problems as well as the emergence of a new plague, Morgellons Disease, an infection with a new and unknown pathogen that is seriously disabling and disfiguring. Over 12,000 families in the U.S. are now infected with Morgellons. Our skies are increasingly hazed over with fake barium/ aluminum particulate, ethylene dibromide chemtrail clouds. Whether in the atmosphere or in the Ocean this added particulate matter is a hazard to the health of every living thing on this planet. There is a main-stream media blackout on this subject so the only way to get the word out is by word of mouth. People are already dying because of the chemtrails. Life expectancy is down. This situation presents an immediate and serious threat to you, your family and loved ones. We must join together to stop this insane program of chemtrail spraying now. Please do what you can to help.

MORGELLONS & CHEMTRAILS

One aspect of the chemtrail story is becoming more and more a story about the spread of Morgellons Disease. The bizarre, unique fibers that have been found in the bodies of the Morgellons infected have been matched to fibers found in the chemtrail fallout and in rain drops. This suggests that anybody who breathes the air may have been exposed to this disease. Researcher Clifford Carnicom has recently reported that blood abnormalities that he associates with chemtrail infection are being found in just about everyone he is testing whether or not they show the visible signs of having a Morgellons infection. "Polymer chemist Dr. R. Michael Castle has studied atmospheric polymers for years. He has found that some of them contain bioactive materials, which can cause "serious skin lesions and diseases when absorbed into the skin." He has identified microscopic polymers comprised of genetically-engineered fungal forms mutated with viruses. He says that trillions of fusarium (fungus)/virus mutated spores), which secrete a powerful mico-toxin, are part of the air we breathe." x

-Amy Worthington GlobalResearch.com

SELF REPLICATING NANO MACHINES HAVE BEEN FOUND "RUNNING WILD" IN THE BODIES OF MORGELLONS INFECTED INDIVIDUALS (see photo #15 of this article, identified nano parasite known a 'golden-head')

Morgellons researchers Dr Hildegaard Stanninger and Dr Karjoom have announced the finding of self-replicating nano machines "running wild" in the bodies of Morgellons victims.

MORGELLONS PATHOGENS FOUND IN RAINWATER?

More stunning evidence of a Chemtrail/Morgellons connection (see photo #18); Recent microscopic examination of rainwater by researcher, Lisa Jones has revealed contamination with pathogens that have strong similarities to the Morgellons pathogen. This raindrop image shows a fiber-like lattice with a lighter colored tube that appears to contain baby Morgellons pathogens. The "thornes" on the lattice appear to be designed to cause the organism to stick and catch on skin and clothing. The unnatural looking orangish-pink glow in certain areas of this tube look just like the unnatural appearing orange-pink glowing points that show up on many of the Morgellons organisms. Chemtrail dispersion of Morgellons would be an obvious explanation as to why this stuff is showing up in rainwater.

CHEMTRAIL POLYMERS LINKED TO MORGELLONS?

Chemtrail aerosol fibers enlarged 60X above

Mysterious, Glowing Clouds Appear Across America's Night Skies

By Alexis Madrigal - July 16, 2009 |

Mysterious, glowing clouds previously seen almost exclusively in Earth's polar regions have appeared in the skies over the United States and Europe over the past several days. ^{xii}

SALVATION

PRAYER OF SALVATION

Steps to salvation:

Jesus said "Ye must be born again" (John 3:7).

1) Believe that God created you and loves you and sent the Messiah (Messiah is Hebrew for Christ) to redeem you.

1) Believe that Jesus Christ came in fulfillment of over 300 Bible prophecies to die for you, to take upon Himself the penalty of your sins (Isaiah 53:5-6, John 6:29, Romans 4:5, First Peter 3:18).

3) Turn from sin and call on the name of Jesus to receive forgiveness of sins (Romans 10:13).

4) Receive Jesus as Savior and experience the new birth (John 1:12, Acts 2:38).

5) Follow Jesus Christ as Lord (John 14:21).

Prayer to receive salvation:

“Whosoever shall call upon the name of the Lord shall be saved” (Romans 10:13).

To receive the salvation that Jesus purchased for us at the terrible cost of His suffering and death on our behalf I invite you to pray this simple prayer:

“Dear heavenly Father, I thank you for sending Jesus, the promised Messiah, to die for my sins. I admit that I am a sinner. I repent of my sins and I ask for your forgiveness on the basis of the death and resurrection of Jesus Christ. I ask you to fill me with your Holy Spirit to empower me to serve you under the Lordship of Jesus Christ, Amen.”

If you prayed this prayer in the humble sincerity of your heart then you have received everlasting life, which includes power to live right in this life and entrance into heaven in the afterlife! ^{xiii}

Witchcraft Modern Technologies

The occult is defined as secretive-hidden knowledge or wisdom beyond human understanding. It could also be described as supernatural detection from sources other than God. *"The secret things (hidden knowledge) belong to the Lord our God: but those things which are revealed belong unto us,"* (Deut. 29:27).

Physical, Mental, Spiritual Realms

Demons attack man not only in the physical, but also in the mental and spiritual realms.

1. Insanity. (I Sam. 16:14; 18:10; Mk. 5:15, 18; Lk. 8:27, 35-36).

2. Suicide and Self-destruction, (I Kin., 18:26-28; Matt. 17:15; Mk. 5:5; 9:22; Jn. 10:10)

3. Torment, (I Sam. 16:14; Matt. 4:24).

4. Destruction and murder, (Jn. 10:10a; 13:27; Acts 19:16)

5. Divination, (Acts 16:16)

6. Deception, (I Tim. 4:1)

7. Lying, (I Kin. 22:22; 2 Chron. 18:20) 22; Jn. 8:44).

8. Contention and strife, (Jud. 9:23).

Blocking Transference of Spirits

I forbid and block all Satanic and demonic activities for myself and all my family our lives. I ask you Father to surround myself, family, church, pastor and leaders and wives with warring angels. The blood of Jesus Christ is between us and the forces from hell in Jesus's name.

Spiritual Trance

Spiritual realms have not changed. God still has enemies and God still has people. The Devil also has people and they are taking territories for him. Meanwhile, God's people seem to be in a spiritual stupor concerning the fact that there is a Spiritual Warfare going on. If you look at the condition of the Church in western civilization, it seems we are losing the Battle! It also seems that Satan's people are deeper in his spiritual realm than God's people are abiding His

spiritual realm. Therefore, Satan's people are driven to do his will. God does not drive his people; they must use their free will. Therefore, most choose and will not to fight or struggle against the powers of darkness. They will to just have fun with the "Holy Ghost." The want to "feel" the Holy Ghost tickling them and making them laugh. They want the benefits of Christianity but they do not want to pay the price for Jesus. The result is our families, cities, and nation are being taken over by the demonic powers. The answer to this dilemma is, they believe too simply to ignore it, that it will go away.

The N.S.A. R.F.I.D. satanic magnetic field altering, tracking soft kill system

BREAKING

Root up and Destroy

Heavenly Father in the name of Jesus, we ask that you root up and destroy every invisible barrier that is standing against the Your people that we are standing in agreement for your divine protection for the people on this earth. **Jeremiah 1:10**, "But the LORD said unto me, say not, I *am* a child: for thou shalt go to all that I shall send thee, and whatsoever I command

thee thou shalt speak. ⁸Be not afraid of their faces: for I *am* with thee to deliver thee, saith the LORD. ⁹Then the LORD put forth his hand and touched my mouth. And the LORD said unto me, Behold, I have put my words in thy mouth. ¹⁰**See, I have this day set thee over the nations and over the kingdoms, to root out, and to pull down, and to destroy, and to throw down, to build, and to plant.** ¹¹Moreover, the word of the LORD came unto me, saying, Jeremiah, what seest thou? And I said, I see a rod of an almond tree. ¹²Then said the LORD unto me, thou hast well seen: for I will hasten my word to perform it. ¹³And the word of the LORD came unto me the second time, saying, What seest thou? And I said, I see a seething pot; and the face thereof *is* toward the north.

Farther we are rising up to defend our spiritual to protect our minds, and health rights against the powers of darkness in the world. We are battling against Satan, his minions and his agents for souls and to let the captives free as You commanded us to do. We are particularly standing in Your name and the power of Your Word believing You to furnish all our needs according to Your promises for our -ministries according to all Your riches and glory.

Powers of God and Powers of Satan is the power of light and dark. The Word says, the only REAL protection is faith/trust in the Lord Jesus Christ, Whose Blood is the Divine Boundary that Satan and demonic powers can NOT cross. Not religion; not "a strong-will"; not this or that power or institution. ONLY CHRIST and HIS Power to save and deliver.

Leviticus 26:13 "I am the Lord your God, which brought you forth out of the land of Egypt, that ye should not be their bondmen; and I have broken the bands of your yoke, and made you go upright."

Father we stand in our position in Christ and we know our spiritual place in Jesus Christ, (Eph. 26). We know how to use the name of Jesus in accordance with the Word of God, (Acts 3-16; 4:12; Jn. 14:12-15; 16:23-26; Col. 3:27; Jn. 15:7-16; 13: 35). We know how to break curses shown in (Deut. 27; 28). We are saved and call on the name of Jesus, "And it shall come to pass, that whosoever shall call on the name of the Lord shall be saved," (Acts 2:21).

ELECTROMAGNETIC DELIVERANCE

The internet is littered with stories of "chemtrails" and geoengineering to combat "global warming"; and, until recently, I took these stories with a grain of salt. One of the main reasons for my skepticism was that I rarely saw what they were describing in the skies. But over the past several years I have noticed a great number of these trails and I have to admit they are not like the contrails I grew up seeing in the skies. They are extensive, quite broad, are laid in a definite pattern, and slowly evolve into artificial clouds. Of particular concern is that there are now so many – dozens every day are littering the skies.

My major concern is that there is evidence that they are spraying tons of nanosized aluminum compounds. It has been demonstrated in the scientific and medical literature that nanosized particles are **infinitely more reactive and induce intense inflammation in a number of tissues**. Of special concern is the effect of these nanoparticles on the brain and spinal cord, as a growing list of neurodegenerative

diseases, including Alzheimer's dementia, Parkinson's disease, and Lou Gehrig's disease (ALS) are strongly related to exposure to **environmental aluminum.**^{xiv}

Demons and Human Agents

The powers of Darkness use human agents who band together and operate in pacts, such as witchcraft, occult, cults, secret societies, false Christian churches. These groups commonly use

a circle for attracting and amplifying what they call “energy”. The invisible powers that they are calling “energy” are demons or bewitching spirits manipulating modern technologies. They are caging the person’s mind, body and spirit in the circle. Eternal rings and triangles do not have breaks. There are objects in their circles that attract and hold the desired they call “vibrations” but they are demons. ^{xv}

A person in needs of physical or emotional healing
Therefore, may indeed require spiritual deliverance

Jesus Himself treated the two side by side, (Matt. 4:24; 12:22; 17:18; Mk. 9:28-29; Lk. 6:17-18; 8:36; Acts 5:16; 10:38).

The Holy Ghost anointed Jesus with Power over unclean spirits.

We have same Holy Spirit and the same ability to be anointed, with the same power, with the same measure of power, (Acts 10:38; Jn. 17:7; 14:12).

Jesus said we could do the same works (Mk. 16:17).

"But ye shall receive power, after that the Holy Ghost is come upon you; and ye shall be witnesses unto me both in Jerusalem, and in all Judea, and in Samaria, and unto the uttermost part of the earth," (Acts 1:8).

This anointing sets the captive free, (Lk 4:18)

Breaks the yoke and lifts the burden, (Isa. 10:27).

Open prison doors, gives sight to the blind

“Sets at liberty those who are bruised”

Jesus is as powerful as He was when He walked on the face of this earth, (Heb. 13:8).

He is as merciful, compassionate, and truthful, He is a present help in time of need.

He commanded us to observe all things and keep His commandments we will receive this power unto men, (Matt 9:8).

Power over all the power of the Devil, (Lk. 10:19).

Examples of the caging circles would be a sketched circle, pentagram, hexagram, and a triangle.

The supernatural law is that the geometric figure will lock in and enslave the willing subjects within in the circle.

The victims standing in the circle physical lives will be protected from the demons killing them as long as they remain inside the ring. Different occult objects are also used such as demonic images, symbols, blood cells, snake, bones, etc.

Witchcraft spell-binding ideologies are introduced such as magic spells which are used for various magic spells for love, magic spells money,

magic spells for protection, black magic, white magic, candle magic, hoodoo root work, lucky charms, high magic, folk magic Spells. The group shows up from time to time and performs ceremonies using electromagnetic energy (Demons of energies) for whatever they choose to capture and enslave the minds of the duped prey.

Spell Casting brings a Mysterious Outcome

Magical Spells from magic signs, language and patterns, perform and other forms are exercised by a compilation of words. The recital of magic spells involves the use of magical language. Whether spoken out strident or understood, words are regularly used to access or steer magical authority.

Ley-Markers

The following natural and man-made features were suggested by Watkins to be reliable ley-markers such as, Mounds, Long-barrows, Cairns, Cursus, Dolmens, Standing stones, mark-stones, Stone circles, Henges, Watermarkers (moats, ponds, springs, fords, wells), Castle, Beacon-hills, Churches, Cross-roads, Notches in hills, Camps (Hill-forts).

In the last thirty years there has been an increased interest in these areas. Like everything else in our polarized world, these practices have a dark and a light side, a malevolent or benevolent aspect, an intention to hurt or an intention to heal.

Projected Demonic Energy

^{xvi} WORM HOLES

Circles are usually set up on the earths', grid and ley lines. These grids and ley lines supernatural avenues and wormholes or demonic power points; witches and wizards travel on the ley lines) that amplifies the circle's energies (Demons). These groups know how grids work, and they know how to run and project the electrometric energy (Demons).

www.bibliotecapleyades.net

Ley lines /lei laɪnz/ are alignments of places of significance in the geography or culture of an area, often including man-made structures. They are in the older sense, ancient, straight trackways in the British landscape, or in the newer sense, spiritual and mystical alignments of land forms.

This explanation by no means completes the modern definition of a ley-line, as we cannot say for example that all alignments of stones are ley-lines, however old they are. Nor does it follow that all ancient sites were aligned deliberately, even those that appear to have been. Alfred Watkins, the modern founding father on the subject, created the first basic set of guidelines in order to describe ley-lines according to his perception. As we have learned more about ley lines, so we have had to adapt these original guidelines in order to explain our findings, whilst keeping to the context with Watkins' original ideas.

Witchcraft, sorcery, voodoo, shamanism, and magic are ancient crafts.

Open air Chemtrail spraying operations are now live in California (all 50 states and all NATO countries). Independent analysis of chemtrail fallout has identified many toxic chemicals including;

Aluminum Oxide Particles, Arsenic, Bacilli and Molds, Barium Salts. Barium Titanates. Cadmium, Calcium. Chromium. Desiccated Human Red Blood Cells. Ethylene Dibromide. Enterobacter Cloacal, Enterobacteriaceae, Human white Blood Cells-A (restrictor enzyme used in research labs to snip and combine DNA), Lead, Mercury, Methyl Aluminum, Mold Spores, Mycoplasma, Nano-Aluminum-Coated Fiberglass, Nitrogen Trifluoride, Known as CHAFF), Nickel, Polymer Fibers, Pseudomonas Aeruginosa, Pseudomonas Florescens, Radioactive Cesium, Radio Active Thorium, Selenium, Serratia Marcsens, Sharp Titanium Shards, Silver, Streptomyces, Stronthium, Sub-Micron Particles, (Containing Live Biological Matter), Unidentified Bacteria, Uranium, Yellow Fungal Mycotoxins

Regular exposure to radio frequency radiation may interfere with the electrical fields of our cells. Common health challenges that have been linked to regular exposure to radio frequency radiation include.

Abnormal cell growth and damage to cellular DNA

Difficulty sleeping, depression, anxiety, and irritability

wireless-altered brains lead to lack of concentration, memory

loss, aggressive behavior, accelerated aging, impaired learning ability and dementia.

Fibrils of proteins clumping in electromagnetically-altered brains are an

identifying characteristic of Alzheimer's, Early Onset Alzheimer's,

Parkinson's, Fibromyalgia, and Multiple Sclerosis and cancer patients.

2010 Air Particulates – Antimony, arsenic, iron, manganese

These figures indicate how many times they are over the “allowable” toxic limit: Aluminum, Antimony, [This is not a typo], Arsenic, Barium, Cadmium, Chromium, Copper: Iron, Lead, Manganese, Nickel, Zinc.

FREEDOM

Father, in the Name of the Lord Jesus Christ, “And Jesus came and spake unto them, saying, All power is given to me in heaven and in earth. Go ye therefore, and teach all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost. Teaching them to observe all things whatsoever I have commanded you: and lo I am with you always, even unto the end of the world. Amen.” (Matt. 28:18-20).

We come boldly to your throne of grace standing in the gap and holding together against the evils that would attempt to hold or bring bondage against the issues that we will present to You. We take the authority to bind the strongman according (Matt. 16:19, 18:18). We take authority over Satan according to (Lk. 11:20, 22), and over all evil spirit power working in and through the following: the powers of witchcraft and Satanists covens in this country, state and city. We break all the blood sacrifices, ritualism, roots and planting, curses, vexes, hexes and spells over our families, churches, city, state and country.

Father, you said that whatever we bind on earth is bound in heaven and whatever we loose on earth is loosed in heaven. We have the power to cast out demons in Jesus name and tread on every serpents and scorpions in the name of Jesus. We command you Satan, and your powers of the principalities, the powers, the rulers of darkness, and spiritual wickedness in high places and demonic spirits of, (name any spirits the Holy Spirit brings to mind), assigned to this prayer group and its families to be bound. You are the defeated foe.

We yield ourselves to Your holy power by taking our position in Christ Jesus Who is sitting in the heavenlies. We cover ourselves and our families with the blood of Jesus. We bind all retaliating devils against everything we own, our flesh and our family. We stand in our authority as Your children and push back the powers of darkness. We bind and cast down the strongman and every stronghold of Satan over our lives, and families.

We lose upon Satan, his headquarters, stronghold, orders, plans, curses and demons, the curses of the Midianites (Judg. 7:25), Ammonites, Moabites and Edomites (II Chron. 20). Let panic, frustration, havoc, confusion, pandemonium, disasters, chaos, destruction upon each other, the hornets of the Lord descend upon them (Exod. 23:28; Deut. 7:20). In Jesus' name.

This research was initiated in an attempt to explain physical and neurological symptoms observed by me for quite some time and in just about everyone, including myself. It's been like a splinter in my mind.

I've observed in recent years that co-workers, those I've attempted to train especially, all seem to be losing their short-term memory. They'll set a coffee cup down and forget its whereabouts 10 sec later, they'll work on stuff for the field and leave the office without it. 10 years ago, trainees could be given three or four tasks at one time and remember them all, now they can only handle one at a time at best, very spooky. Children in particular, those who should have a strong memory, seem affected also. Store clerks and others seem to suffer from these same neurological symptoms as well.

As for me, my nose runs a lot, my ears ring now constantly and my vision in one eye has become a little blurry, my joints ache, etc. It is these observations and my continual observations of the sky that led me on this quest to see if there could be a connection.

I've always had to watch the weather to protect the crews and equipment and complete the task at hand. I've been actively photographing the aerosol spraying above the White mountains. (6500 ft elev.) of Ariz. since 2005 and created an entire photo blog of one year's observations at least 50 hrs. a week that commenced in Dec 2005. My conclusion was that the entire upper troposphere contains what can only be described as synthetic clouds that have been introduced by aircraft. I've not just photographed the spraying but the morphing of this substance into clouds of a fibrous nature and other bizarre cloud formations not found in early/ANY cloud textbooks. See: "*Strange Days Strange Skies*"

In the last year however, I've observed and photographed an extraordinary sheen around the sun, which indicates a saturation level has been achieved, and the spraying now is infrequent by comparison I.E. once or twice a week (at best). This sheen can also be seen around stadium lights on TV. I've recently noticed that when the sky is an azure blue, like it should be, the planes will not be long off to seal the hole I guess. I've been trying to figure out how the clouds could appear so fibrous at times and understand now this process is likely to be a function of nano-tech polymer's self-assembly technique (see clouds connecting in the Lakeside aerosol photo's). Gases could not striate like this, and what goes up, well you know, Newton was right.

Just using a strong flashlight pointed upward at night and looking into the focused beam of light prove that we are living in a virtual bath of what research by others suggests is an exotic form of barium, aluminum and God knows what else, but I cannot afford complete testing

myself

(see "ca

rnicom.com" barium test confirmed).

This stuff has become so saturated in our atmosphere, at least here in the White Mountains that quite often sunlight can be seen streaking to the ground through it when cloudy, much like when sunlight streaks in through one's window blinds when cooking smoke or other smoke is present inside. This stuff has reduced our sunlight compared to two years ago, as I set a light meter then and it now measures a decrease in light of about half. This is also evidenced by my camera, whose flash operates now in the morning way more than it used to, and at times lights at the park that are on photo sensitive switches (and cars) turn on during the day or turn on way before dusk, very concerning.

The alkalizing of water and any water-based air breathing organism allows for increased storage and even the creation of dc current, especially when mixed with other components / chemicals. I proved this in myself with only a pretty good digital volt meter. I measure my voltage constantly by just wetting my fingers and squeezing the probes.

I started looking at the collected water with an old microscope in early April by drying about 30 drops on a microscope slide and saw immediately what appeared to be what I'd seen coming from Morgellons patients on the web. I really had thought the story was a hoax quite frankly but know now otherwise. I started to look at all my samples and found dozens of these fibers. Confirmation of what these fibers were came on April 18 2007, when a "Golden head" nano sensor was isolated. This confirmation was quite the shock because I knew then all of us in the White Mountains at least were all being infected with this bizarre nano affliction, infestation, infection.

Why the voltage thing is so important: I've observed in my jars that were electrolyzed that the growth of what I've learned are called "synthetic model organisms" (or artificial life forms) is greatly enhanced and increased. The fibers they call Morgellons increase in about 6 mo. to almost visible with the naked eye or magnifying glass. One such clump of fibers has gone from a dozen microscopic fibers to about a hundred or so and can easily be extracted by tweezers. Two of the translucent silicone nano tube fibers are clearly evenly segmented and one strand appears to have a DNA strand twisting through its core. How this is possible I don't know but it's neither a delusion nor illusion as I still have and observe them frequently.

Since I can observe that we live now in an energized electrical bath provided by the “miracle grow” stuff (metal particulates) added with the ever increasing microwave towers, cell phone towers, radio towers, satellite transmissions, electric lines, wi-fi systems etc., couple that with

the ever pervasive presence of plastic water pipes, plastic plants, plastic clouds, food wrapping, car interiors, plastic clothing, plastic x-mas tree's etc., there would appear plenty of plastic components with which to work, if this is possible. Plastic is in a constant state of degradation and hence vaporization. One plausible explanation of how the flat ribbon like fibers seem to grow even on glass is that these synthetic model organisms can assemble plastic components from the air, water or wherever present and use dc current as part of their assembly technique, or they are feeding off the silicone in the glass or both. It's been proven that plants extract most of their mineral content from the air not from the soil as once was believed. Nano-tech is designed to mimic the things that man has discovered about how nature works, assembles itself etc.

This also would explain how these tiny fibers have worked their way from the inside of our/my body to the outside of the skin unnoticed by our immune system. We have lived, breathed and drank plastic residues now for so long, it's become part of our body's composition. Since the skin constantly sheds from the inside outward, and the skin completely regenerates itself every seven years, my guess is that it took about ten years to surface as photographed. Approx. when all the aerosol programs or so called chemtrails started.

I started looking at dried droplets of this collected water before electrolysis and that's when all the fun began. I started to see what I saw on the net and was called Morgellons fibers. I saw this story about people who have fibers growing out of their skin but initially thought it was an internet hoax. It was said these fibers could grow on their own and created a myriad of symptoms from skin lesions to brain fog and memory loss. "*rense.com*" has interviews with Morgellons patients and some doctors who are treating them)

My first reaction was to flee the area, but that was economically impossible, and decided to continue studying the problem. I set up another testing station 300 miles away which yielded the same results. By now as if all this wasn't enough, now there were other things growing in

the water. The first one I noticed was a small tapeworm looking thing I interestingly called Fred. It started as a pinhead size tan speck in the bottom of my jar. This thing assembled itself quite quickly in about two weeks from about the size of a pin head to its current size about 1 1/4 in long.

I began spending hours every night and every weekend on the microscope looking at these bizarre growths. No visible biology as we know it whatsoever. In the same jar Fred grew, a few dozen Morgellons fibers had clumped together and at one-time Fred got tangled in them pretty good. Much to my amazement Fred slowly freed himself from this mess which I watched for about 3-5 days. The fibers accommodating the effort by moving out of the way. To this day you can't get them to tangle up. I spent the entire month of May studying this bizarre growth, the fibers and doing other tests. I then decided to test north 1100 miles, in Idaho.

The opportunity to quit my job came up and an offer of a substantial increase in pay was refused. I had a lot of respect for this friend as we had worked well together in the past. I felt I owed him an explanation as to why I was going to turn him down and move so I showed him the extent of my research. I showed him the extent of the chemical poisoning we were living in and the consistency of that poisoning from week to week (a dozen jars at least). I had shown the other office the chemical poisoning also, but not the biological stuff. I showed him my entire collection of weekly tests and told him of the Morgellons fibers I'd found in the water. I showed him Fred, the thing that grew along with a smaller one of the same. I told him I could prove without any shadow of a reasonable doubt that we are currently under not just chemical attack but also biological (synthetic). I wouldn't have told anyone this if I couldn't prove it ad nauseum. His reaction like most was quite mild but had never heard of Morgellons and knew not of what this would mean in his future. He did the ostrich thing like everyone (another observed neurological symptom), if you don't recognize a problem, it must not exist. I believe if he had listened to the Rense audio files, his reaction would've been different.

I soon left for Idaho and the first three days there the visibility was good, and a small sheen around the sun meant I might have found a safer haven for my family to move. By the third day however a large spraying operation could be seen to the east and I started looking in spider webs and on the oozing sap on trees and on the new sap on my car. The conclusion: these fibers are everywhere. The anxiety, fear and terror returned that I had come to quell during the month of May looking at all this. My hopes for the future destroyed and the realization that everyone from here to Idaho has been infected with this heinous man-made creation (type Morgellons into "you tube") has become a reality. This particular town's water supply is drawn from the lake, which can only mean they are getting a double dose, not just their air but their water too.

returned from Idaho and decided to continue my research, which has only gotten more bizarre, if that's possible. I discovered another thing growing, a square pliable (perhaps protein) crystal of some kind about 1/4 in square was growing. It's continued to get thicker not expand as one would expect and thickens slowly to this day.

I made a wood frame 13×13 in and took ultra-clear packing tape and covered it completely stretching it across the opening. I laid it sticky side skyward and left it outside overnight. In the morning I let it dry in a closed area then placed a 12×12 piece of thin glass on the tape to seal in my overnight collection of fallout from the sky. I looked from the glass side through to the tape with a cheap \$10 60x-100x microscope from radio shack, (good for looking at your skin too) and there they were, confirming that's one provable source for these fibers to have come. Spider webs have the same effect. At any rate I set up another testing station and decided to run this one for two weeks and not electrolyze the water. This has yielded new synthetic model organisms different from the rest. It (3d morg) started off looking like a Fred thing but had an odd looking black seed-like thing with odd small spikes sticking out. It was about the size of 1/20 pin head and like the Fred things was surrounded with the tan coloring stuff of Fred.

It popped I guess and created a bag of sorts. The bag was comprised of hundreds of fibers that looked a little different than the ribbon-like Morgellons fibers though many of those were present. At this point I realized I needed cameras as no one would believe any of this already. Hell, I still can't believe most of this. I bought two microscopes and started to photograph all this stuff and more.

I have seen evidence of this replicating technology myself in spider webs, (on skin and in hair also) finding clear silicone nanotubes mimicking plant structures

and other things but at a much smaller scale. If as claimed this thing can come in contact with a bio form and replicate parts of its RNA/DNA (by transcription and Quorum sensing), and then attempt assembly with available components, silicone being the most abundant, isolation for study will be almost impossible. Fibers living on glass suggest this thing can suck silicone out of glass to self-assemble, look closely at the attachment points of these fibers on glass.

It remains my great concern that components of viruses or the complete virus itself may be also replicated and remains an undetected / undisclosed aspect of this technology. I offer my observations with the assurance of duplicability. I only record what I can duplicate first. I offer this work with extreme urgency believing time maybe short. The growth of mold structures in my bugers (and most likely yours) is a real concern, the most probable

suspect is a weaponized fusarium fungus.

It remains an idea that this thing may only be defeated with resonant frequencies, tuned to destroy the Quorum sensing capacity of this technology, rife technology. It remains an observation that perhaps light wave tech. might influence these things, since auto-fluorescence was achieved and is in my opinion evidence of the frequencies at which these fibers vibrate. It remains a concern that oxygen may be in real short supply, atmospherically.

It remains logical to assume microscopic fibers that collect / conduct electrical current are growing in our brains and slowly shorting out our neurons IE memory, or Alzheimer's. Denying conductivity to these creatures is perhaps the key though seemingly impossible.

Another thought on insect vectoring is that this technology can reside in the fluids of insects, when bitten by them the technology transfers with the DNA/RNA from the insect then attempts reconstruction, perhaps of the venom, within the human host. This would explain the DNA of insects and plants that have been isolated in infected humans.

A new and quite disturbing observation / possibility about our current situation is as follows: According to testimony given by those infected, *a hive mentality has been observed by those afflicted*. This suggests A.I. or "artificial intelligence", but to what extent is unknown.

Also, the lower level cloud structures which appear now for the most part disassemble now far more frequently than two years ago. Originally my chemtrail photograph project started after observing a rather large cloud completely disassemble into a powder of sorts and blow visibly away on the breeze in minutes and observed by my co-worker as well.

The recent article of an air grab study in Phoenix titled "chemtrails shocking Phoenix air quality study" proves or vindicates my work and discoveries. Aluminum measured at 6400x above the toxic limit, along with Manganese at 5820x, Iron at 28000x, Barium at 278x, etc.

t's the beginning of the monsoon season here and I'm quite certain judging now at how often sunlight can be seen streaking to the ground like sunlight through a window in a smoke-filled room, that living here is much worse than in Phoenix in that all the pollution from below rises up here to form rain clouds. Clouds now disassemble not evaporate with such frequency that I no longer photograph them and have stopped almost altogether my chemtrail photography as it no longer matters.

Clearly, we continue to be suffocated slowly by metal particulates.

The purest form of science is observation and after hundreds of hours of observations I can say without hesitation: "Houston we have a problem !!".

Aerosol spraying:

in a nutshell the way I see part of our dilemma, many of these synthetic clouds are nano tech polymers pre-programmed with certain geometric assembly functions to look like real clouds. They can retain this programming down to the nano-tech level as they degrade. Their programming can be diverse in nature, IE assembly, association, self-replication, all three or more, etc. This implies undeniable intelligence and or pre-programming or control of some kind!!! On top of the metal particulates removed by me in our air, photographed in my blood and electrolyzed from my urine, we have plastic components (photo degrading at this very moment and present everywhere) of microscopic size, capable of geometric pattern regeneration and replicative / self-survival behavior. The Morgellons syndrome could be more correctly labeled "Synthetic Cloud Infection Syndrome".

Blood things:

I have been verifying Cliff Carnicom's "carnicom.com" work for years and his blood observations (6 communications 03-07-08) is a must-read now. All blood looked at so far has anomalies in it. Even my dogs'. The first time I looked at my blood it took me weeks to get over it and look again. It's that bad. Blood should contain not much more than red and white blood cells

. Knowing now what's in the chemtrails makes me cringe when I see them spraying. This is nothing less than state sanctioned / sponsored terrorism / mass homicide!!!!
Though the government has reserved the legal right to test stuff on us (usc 1520a) the

states have a legal / moral / ethical obligation to protect us, I guess unless they've been promised more tax dollars, protection, and or the antidote.

I had a friend recently diagnosed with what was described as a rare form of blood cancer. Looking at my blood I can't help but wonder if that was really the true or rare cause. All people that look at blood for a living must know what is really going on!!!!

Skin photos:

The skin photos clearly show a metallic sheen has built up in our skins, along with faint red splotches. This metallic sheen is preventing close observations of the extent of the translucent fiber infestation which most are probably not fine hair as we know and understand them. Pinhead size skin eruptions which develop quite quickly then take weeks to heal have been found and photographed. These skin conditions have been observed / photographed on others as well.

The glue stick stuff:

I discovered quite by accident that a cheap hot melt glue stick gun, is good for sealing microscope slides as it preserves the specimen and is like a lint brush for Morgellons fibers. Spread some on a slide, let cool and then rub all over your forearm. The tiny fibers will stick to this glue stuff and if you don't believe that's Morgellons fibers wait a

few months and look at it again. Not only do they stick to it but will grow quite rapidly, the red ones in particular. Oddly enough about 20% of the time the glue stick stuff itself on the slide will grow into bizarre strands as well. I noticed balls of glue stick that would appear and removed them only to find them again in the same spot. It remains an observation that the slides which have squished buggers in them are the primary slides on or in which the glue stick grows. Sometimes it grows quickly sometimes in months. My buggers may somehow be the cause. God save us.

The nose things:

Over the past few months a new infection appears to be culturing in our noses. Field workers are all getting this odd nose tickle (many with mustaches). A strange white thin stringy bugger is the cause I believe and have placed a dozen or so on slides and looked at the growth over time. Oddly enough when small they look like fly maggots but can get quite long. What's been observed is as bizarre as the rest of this story. Geometric crystal growths, snowflake designs, Morgellons fiber growth, mold looking fibril growth with sporulations.

To duplicate this experiment after a shower blow nose into a colored wash cloth or plastic baggie and look for small white stringy buggers that don't want to separate, but they will if pulled apart. Water makes them expand a lot. Place inside and on the side of a clean closed jar with just a tiny bit of moisture in the jar and let sit for 48 hrs. Remove and dunk in some distilled water and place on a microscope slide. Gently squeeze the cover plate and seal with glue stick gun, leaving just enough air underneath for continued growth and observe. Nine months later more glue stick stranding has been seen. This discovery of what appears to be mold culturing in our noses is a great concern as many types of mold are neurotoxic to the brain. In small but consistent doses damage may go unnoticed until it's too late, but this may already be true. This would however explain a number of neurological symptoms described by Morgellons patients. Just digging out a nice dry bugger and soak in distilled water for about 5 min will give about the same results and there's always morg fibers in them. I don't have access to scientific grade distilled water however.

The spider webs:

Anyone who needs to prove any of this to themselves needs only a half decent microscope at least 40x-100x and spider webs (or their own buggers or blood). Use a microscope slide and ultra-clear packing tape to seal the web to your slide. The web should be old and dirty to some extent but needn't be real dirty. I have discovered more verifiable completed nano tech things in spider webs than anywhere else. Segmented silicone nano tubes and nano feathers (see Cliff Carnicom's carnicom.com photos and work), always Morgellons fibers etc.

The starfish looking things of multiple leg design remain a current fascination. In the center of almost all these creatures there is a controlling fibrous substance / structure which appears to control and or direct growth. This creature / thing has no discernable biology as we know it and appears made of perhaps silicone only. (My instincts believe these are most likely neuron replacements / implants for our brains, type in nanobots and neuron interface into you tube, they've been considered if not constructed).

They have been found in almost all exterior webs but not inside as of late (5 outside 2 inside) probably because the outside webs are years older than inside one's.

It's imperative that those concerned make their own observations and don't believe my work, get off your duff and verify it yourselves. (My air collector can be made for about \$35) For the most part I no longer photograph Morgellons fibers in spider webs, they are far too frequent and no longer a surprise. Every spider web so far has yielded photos.

Non-electrolysis synthetic model organism:

In the month of May I went fishing at Hawley lake on the reservation. They have poison ivy there which I always watch out for. I had gone in the water to retrieve a lure about up to my knee cap. A few days later I got what I was sure was poison ivy on my calves, though I had seen none where I was fishing, it lasted however for about a month, when usually it goes away in a week. When scratching it, it bled easily and seems somewhat similar to the description given by Cliff Mickelson. It's speculated that since my electrical bio field is so strong that possibly when I was in the water these nano things were drawn to me like a magnet.

Detox Observations:

During all this I decided to try and detox from these metals and did the ionic foot detox bath which was quite the experience. I thought it first a parlor trick until I electrolyzed the stuff and looked with a microscope at the water after treatment I noticed immediately I could smell and taste again much better, but now the air left a metallic taste in my mouth which took about 3 weeks to go away, presumably because I was re-acclimating to the air. I then tried acupuncture and chlorella detox but had to stop as I could taste my fillings thanks to the mercury in them. I took a drop of "miracle grow" (metals from the air), let it dry, and put a drop of chlorella on it. To my amazement the chlorella washed violently over the "miracle grow" then stopped. The chlorella either won or lost I don't know which. I tried a drop on some morg fibers and nothing happened, silence. Very odd. My conclusion: detox works if you can get away from the toxic stuff but may be detrimental otherwise.

Effects on Nature:

Most of these observations were made outside a small town (approx. pop. 10,000), about 6 miles initially. Since I have lived here we have a large willow tree about 15 feet tall and 10 feet wide. When it blooms thousands of honey bees would swarm it for weeks. The din from the bees could be heard inside. This year 2007 maybe 200 to 300 bees came to feed. When I first moved here in 2002, bats would patrol my porch at night and hummingbirds by the dozens would feed off this porch. Now there's no bats, few bugs and a few humming birds (2007). Also, we would get small fly-like insects growing on the moisture on the windows. In 2006 almost, no bugs grew on our windows that summer and few flies found their way inside, though we have no screen doors.

“To sin by silence makes cowards of all men”

In summary you want to know why our, birds, bees, frogs, and now bats (there are few bugs left) are dying, (nary an apple found on this mountain this year, and my return trip from Idaho almost no huckleberries had grown). *It's undeniable that we and all life forms are under deliberate chemical and biological nano attack*, DOE and DOD are most likely involved, your tax dollars at work (to kill you with soft-kill, high profit pharmaceutical weapons). That the chemicals removed by me, found in our air / blood, water and urine is providing an enriched environment for the accelerated growth of these synthetic model organisms. This chemical is increasing body and environmental electrical capacities, providing the dc current for these synthetic organisms to self-assemble. The diverse nature of the organisms observed may be a function of the “silentsuperbug.com” but Morgellons fibers are in my opinion different things. The body is providing the electrical current for these things to self-assemble, as the body is electrical first and chemical second. Every living thing on the planet is currently being colonized by these artificial life forms, to what end is not known. This brings to mind the movie the “Matrix” and I wonder if and/or how they knew.

A new source for morg fibers was found in an old paper wick inside our humidifier. It's about 6-8 mo old and has not been used since the summer. It's loaded with them and

other things. The truth remains, every single time I look at new stuff it gets worse and worse.

In 2004 I believe, three weeks before Xmas a very spooky thing happened. An unusual chemical smell was in the air, that was noticed by others as well, that smelled like a pesticide. One morning I woke up and couldn't remember the day, what time I was to go to work, etc. I panicked a little but drove to work anyway kind of stunned. I was afraid I had a stroke. At 6:00 am on the way to work there were not one but three major accidents on the main road. Highly unusual that early, rarely seen three accidents in a month. For the next month everyone in the office, store clerks, etc. seemed to have the same thing and jokingly the term early-onset Alzheimer's was thrown around by others, I found it not funny however, I was aware something had happened. I slowly regained much of my memory but it felt like I had to fight for it back. I mentioned this observation to a co-worker and he told me his wife, an accountant for years, said she all of a sudden was having trouble with normal math during that same period and said he too had forgotten things more than usual. During X-mas, store clerks would take money and forget immediately what it was for or stumbled trying to count change continually. I was, still am, quite concerned. It took about 3 mo. to recover and about 3 months later a Doctor named Patricia Doyle called the Rense program with the same exact story (type in amnesiacs). She said her small town back east was experiencing this memory dysfunction after heavy spraying, and she apologized for having to read notes she had made for the program, as she too was having short term memory problems.

About three years ago I was showing my aerosol spraying photos and some others I had gleaned from the net to the owner of a video store where we rented videos. A man at the counter became interested and looked at my photos. He immediately recognized some of the aircraft in the photos as C-130 cargo planes. He seemed concerned and vowed to investigate, then left. The owner told me that was her brother and if anyone could find out, he could as he was retired military intelligence. About four months later I asked if he'd found out anything, and this was the story she recounted. He said indeed the spraying was quite toxic and he had been present at a confrontation by I believe the Navaho nation and the EPA. The EPA contended everything was ok until the Navahos presented their evidence to the contrary which was quite compelling. The EPA then closed up its books and left without another word. I asked her to have him call me with more details but two weeks later she closed up shop and left too. I've not been able to verify this story since.

Another recent revelation came from the article: Are microwaves killing our insects, birds, frogs and us? The metal particulates which separated in my blood are photographically identical to the metal found in all air samples. This can only mean our cerebral fluids contain these particulates. Ever put metal in a microwave? What do you think happens when you stick a .5-watt microwave cell phone next to your 70% water 30% cholesterol brain with about 2-4% of some type of exotic metal flowing through it, micro-sparks would be a good guess? The article stated a 200-meter (approx. 600 ft) range around the base transmitters to be the most detrimental to any life form. How close to the road are most of our microwave antennae and why are they in our high school yard?? I've read reports that at full power these transmitters can cook all life within 1/4 mile. They could turn them on full blast and by the time you realized driving through the field that something was wrong you'd be dying shortly, like within minutes of brain cooking!!

The disappearance of the bee's, bugs, bats, birds etc. correspond with the installation of all the microwave antennae on this mountain!!!

This is why *apathy doesn't work* and when we saw the spraying, (or were exposed to terrible injustices, the Kennedys, Vietnam, Waco, 911 etc.) we should have mobilized quickly to stop it. "To sin by silence makes cowards of all men". It's now my belief that Morgellons is what Alzheimer's patients have and can likely be proven with post mortem brain slices perhaps from dogs, and the miracle grow stuff in our air is slowly but continually being electrolyzed in our brains and bodies perhaps in specific or targeted areas. It remains possible that we may all be incapable to respond to any threat, though that's no excuse. Our pineal gland (the fight or flight receptor in our brain) has been plagued over or destroyed in my guess and fluoride (see university of Texas studies) has likely helped do that. One year of sodium fluoride destroys this gland almost forever. It's imperative that you reproduce any of these observations, should you care or dare to see how bad the air really is, but few if any seem to give a shit about anything anymore, another neurological observation of real real concern.

My true observations of people now believe the gov't could start shooting people in broad daylight and people would just go about their business without intervention or condemnation. Oh, wait it already happened at Waco (watch "rules of engagement, the true story of Waco!") and the current and past wars.

To understand what our future holds and for other ideas on this it's highly recommended that all the Morgellons interviews on "*rense.com*" are listened to backwards (14-7 will give the best overview).

I regret now having discovered all this, as I was much happier (though concerned/confused about all my neurological observations above) not knowing all this stuff, as it has completely disrupted my life, but it's my hope that maybe a cure will be found (by accident maybe) by perhaps someone who gets this.

Reproduction of this work is encouraged, for non-profit, educational purposes only. It's not for everyone but can be shown to others who might care, if you can find any. Photos may appear on web sites, credits to "Blue ", but may not be sold without my written permission. If you have received this, I'm sorry and may God bless you. Problems cannot be solved unless one knows they exist. Be cautious to whom you tell, don't upload on your hard drive or transmit electronically or be on a computer hooked to the net. or near wi-fi systems. I recommend you review the work done by Cliff Carnicom.com (or type in aerosol crimes) and in the work by others.

It would appear man has out-smarted himself, or this is the wrath we deserve for our apathy, or this is the start of the promised 80% population reduction recommended in U.N. documents with a twist. The twist is they'll mine us to pay for medical stuff as we die anyway. Make no mistake, the elites probably have the cure. This would however explain why so many highly trained microbiologists and others have been murdered (300+) over the past 5+ years, many satanically. If anything, this and all my other projects have taught me that man as a species has had all their self-survival instincts removed, as I've been pointing to these observations of our sky (as have millions of others) for years (late 90's) only to be laughed at by those who worked inside mostly. It's no joke any more, sadly though there's always the chance I could be wrong, at this point maybe 2%, though I pray I am every day. Oddly enough "the more truth one seeks, the more truth one's sent", or at least that's my story.

We are under attack from all directions.

Case in point:

How many lab rats developed severe organ damage eating GM potatoes? **All of them (still gets FDA approval, you'll eat some tonight probably)**

How many days did it take to notice changes in the rats? **10**

How many days to recover? **140**

How many days can a rat survive on just water? **7**

How many eating some common puffed breakfast cereals and water? **7**

How many lab monkeys died eating aspartame (diet sugar)? **All of them (it's now in over 8,000 foods, click "DORway" for further info.**

How many IQ points will sodium fluoride (toothpaste fluoride) remove over time? **6 to 10 at least (read the back, its poison, call them)**

What's the average IQ loss of vaccinated participants in the U.S.? **10-16 at least.**

What was the autism rate in 1940? **1-400,000**

What's it now? **1-164 (soon projected at 1-94)**

How many Amish and Pennsylvania Dutch un-vaccinated children have autism, in one clinic after 2,200+

children? Only 4, and they are among the only group of 12 kids who got all their vaccinations (read educate before you vaccinate).

Has the EPA granted license to test pesticides on orphans? Yes.

How many state government have responded with testing to thousands of requests from concerned citizens about chemtrails? None.

How many de-classified US documents of experiments on populations with chemical and/or bio. weapons are there? +20,000. (watch documentary "endgame")

Now it's our turn!!!

How many people were fired for failing to defend the US on 9-11? None.

How many healthy children were irradiated, in many cases to death, but parents were told it's an experimental ring worm treatment? +10,000. Type in ringworm children.

In 1950 what rating was given to our education system? 1st place What's it now? Near bottom of the industrial nations.

Why? See all the above. Read "*The Deliberate Dumbing Down of America*" Now a free E-Book.

How many pigs (one of the most acute smell sensory animals) would eat GM corn when given a choice? None, almost to the point of starvation.

How many now after reviewing all the evidence above believe that global warming (and poisoning) is man-made, well it is, and they are called pilots (your tax dollars again at work). What's their solution? A global tax on us. Let's summarize, they spray the stuff, deny there's a problem, energize it which heats it, they blame it on us and our activity and tell us we need to give them more money to combat the problem they are continuing to create. Makes about as much sense as the war on terror while the borders remain wide open. These examples are what Orwell coined as "doublethink", the ability to hold two contrary notions in one's head and believe them both.

Are you starting to get the picture yet or do you need more proof? If you aren't disturbed by anything above there is something seriously wrong with or perhaps controlling you!

Just because these heinous acts are/were committed against others doesn't obviate your concern and/or intervention. They are crimes against all God's wondrous creatures in general.

Everyone one of us and every living thing is living now in a state of sanctioned, deliberate, heavy metal intoxication / poisoning of differing degrees and stages, as inside air and outside air are different, as these positively charged metal particles are drawn to the ground first. Those of us who work outside will bear the brunt of this first, and those who work with or around transmitters will show advanced symptoms. But it's still inside too. I've been to houses which have ventilation hoods and where the people don't smoke, yet even in those houses sunlight can be seen streaking in through the blinds and is written off as "just dust particles". I'll say!

If you listened to the Rense audios, you'll understand the psychological degradations associated with this infection, and the heavy metal intoxication / poisoning will make it much worse. Negative traits are amplified and many law enforcement personnel who enjoy domination over others will worsen, and they are likely to become more brutal. This is already evidenced on you tube videos of police brutality and reported treatment of the local citizenry.

By now you're probably thinking I'll just drink more water and flush this metal stuff out, which would normally really help, except try this, electrolyze a glass of your tap water and remember this process will only remove the metals (ionic salts) in your tap water All metal is poisonous, heavy or not, in high doses and outside evolutionary time

parameters. MMM doesn't that look good, but the water company says it's ok to drink; my guess is they're lying, too.

How could we be so blind..... see all the above, it's been by design.

How could God (or just your sense of "fair play") forgive us for allowing such blatant travesty as above, he can't, he won't. You wouldn't!!!

Evil spreads when good people do nothing.

All species and life forms are under deliberate, multiple attack. It's not like a dog barking or rattle snake near you, that your instincts know to react to, and understand your instincts aren't your own anymore, they've been co-opted, it's an awareness of your surroundings, LOOK UP, what goes up must come down. Does that look like a normal contrail or cloud, if not you're probably breathing that!!! Maybe you should be concerned. No those aren't clouds they're chemicals (type in strange days strange sky's or see my photos). Think again for your survival and most importantly others'. Spend a few hours proving anything you've been told to believe. You'll likely find them to be all lies!!! The state and feds have all said those are normal contrails and not to worry, see my photos, are those clouds or chemicals? If they look like chemicals, they probably are, are you worried yet?? Do you still believe them? If so you're in trouble as we all are. ^{xvii}
